

REMARKS

The compound referred to by the Examiner in Claim 1 is correctly set forth in the specification in the Summary of the Invention section. Also, the Summary of the Invention describes the formula of Claim 2 as the formula of Claim 1 when X represents a trimethylammonio group. Applicant has accordingly corrected the formula of Claim 2 to reflect this.

It is submitted that the claims as amended conform to the requirements of 35 USC §112, with no other rejections outstanding, and accordingly it is requested that a Notice of Allowance be issued in this matter.

If any fees are due and owing, the Commissioner is authorized to charge Deposit Account 08-2455.

Respectfully submitted,

1 November 2007
